

MATHEMATICA PANNONICA

23/1 (2012)

CONTENTS

BRECKNER, W. W.: Nachruf für Prof. Dr. Gyula Maurer	5
MITSCH, H.: Classes of semigroups with compatible natural partial order II	9
VELDSMAN, S.: Near-rings of polynomial functions	45
NEUMAN, E.: On Gauss lemniscate functions and lemniscatic mean II	65
SLIEPČEVIĆ, A. and KATIĆ ŽLEPALO, M.: Pedal curves of conics in pseudo-Euclidean plane	75
ORHAN, H. and DENIZ, E.: Subordination results for subclasses of analytic functions defined by a differential operator related to conic domains	85
BLAHOTA, I.: On the L^1 norm of the weighted maximal function of kernels with respect to the Vilenkin-like space	103
HUI, S. K. and SARKAR, A.: On the W_2 -curvature tensor of generalized Sasakian-space-forms	113
GARDNER, B. J.: Rings in which every infinite subset contains a pair of elements with zero product	125
KOMATSU, T.: Linear recurrence relations associated with multinomial Pascal triangles	135
SCHIPP, F. and SOUMELIDIS, A.: Eigenvalues of matrices and discrete Laguerre–Fourier coefficients	147
TÓTH, L.: A note on the number of Abelian groups of a given order	157
