

MATHEMATICA PANNONICA

26/2 (2017–2018)

CONTENTS

BOOTH, G. L. : On Primeness and Radicals in Near-rings of Continuous Functions	3
SCOTT, S. D. : The Weak Descending Chain Condition on Right Ideals for Nearrings	15
PHILLIPS, T. R. L. and SCHMIDT, K. M.: On Unbounded Positive Definite Functions	33
FÜLLÖP, V. and MÓRICZ, F.: Sufficient Conditions for Double Trigonometric Integrals to Belong to a Zygmund Class of Functions	53
MANDAL, Y. C.: Yamabe solitons on generalized (k, μ) -space-forms	67
SHAIKH, A. A. and DAS L. S.: Second order parallel tensors and Ricci solitons on Lorentzian Para r -Sasakian manifold with a coefficient α	79
BRUNOTTE, H.: On Akiyama's Conjecture for quartic CNS polynomials	87
ABO-ZEID, R.: Solutions of a higher order difference equation	107
MENDES, D. I. C.: Fully $*$ -prime rings with involution	119
